ABOUT ACH

ADVANCING BOLD POLICY FOR HEALTH CENTERS

ACH is pushing harder for policies and practices to improve health outcomes for patients and ensure the Health Center Program can thrive.

Our policy priorities include protecting the 340B Drug Pricing Program and Medicaid for health centers; enacting policies that support a strong, resilient health center workforce; securing sustainable federal health center funding; creating infrastructure for value-based care; achieving greater health care access; safeguarding health center infrastructure; and enabling innovations to improve health outcomes.

Advocates for Community Health (ACH) represents the largest forward-thinking health centers in the nation; the average ACH member serves 91,000 patients and has over 1000 employees.

ACH leads sophisticated and impactful advocacy to drive support, secure resources and advance policy in support of member-driven policy priorities representing the needs of forward-thinking, innovative health centers and the communities they serve.
